# TRACK 20 FP2020

Monitoring progress in family planning

The Track20 Project, implemented by Avenir Health, is a five-year effort to monitor progress towards achieving the goals of the global FP2020 initiative. The objective of the project is to support national efforts to collect, analyze and use existing data to track annual progress in family planning. This is being done through the creation and implementation of new and modified tools that provide a new role for country-produced service statistics and contraceptive commodity data. This creates a new system that produces annual estimates on a range of key indicators measuring modern contraceptive prevalence, commodity security, choice, quality of services and FP expenditures.
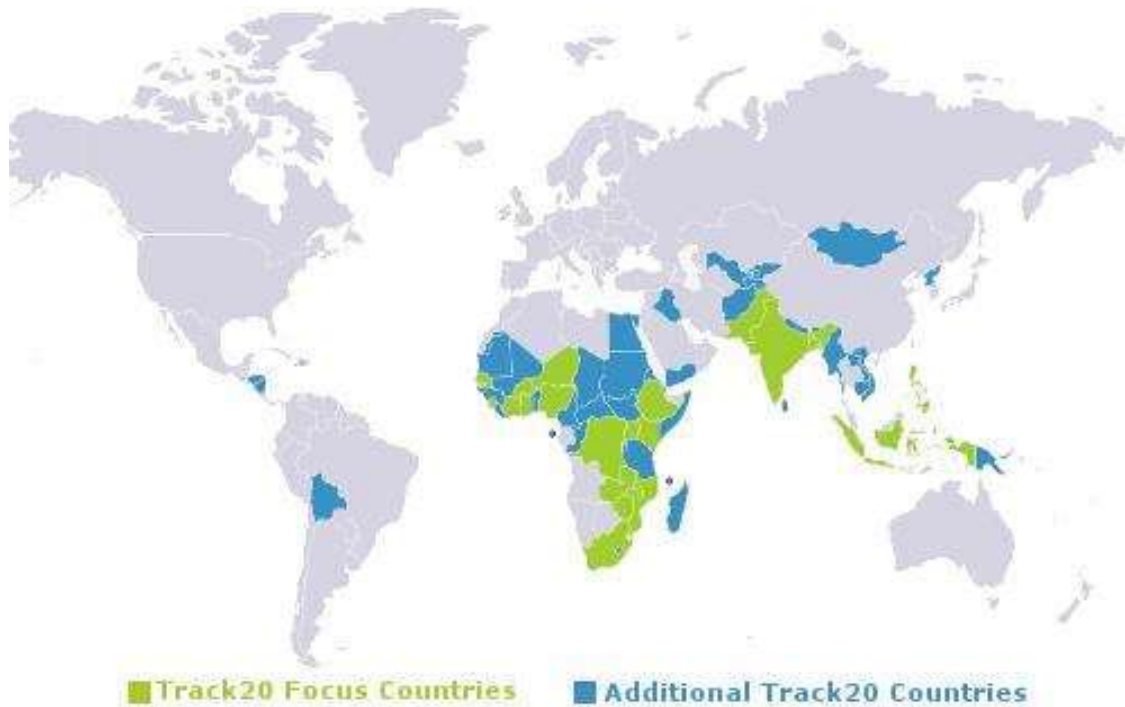

Track20 partners directly with Ministries of Health and provides technical assistance that is tailored to each country to maximize opportunities to complement existing projects and initiatives.

Overview of Track20

Current Situation	Track20 Activities	Vision for 2020
Most indicators available only every five years (DHS, MICS)	Service statistics New estimation methods	Annual tracking of key indicators
Under-utilization of FP data collected through public and private sector programs	M&E officers dedicated to FP Training	Annual program reviews
No global estimate of FP expenditures	Include FP in COIA (WHO), NIDI (UNFPA) and KFF data collection	Annual estimates of FP spending by country and source
No regular global synthesis of progress, barriers, success stories	FP2020 annual report Track20 website	Annual report of global progress, success, barriers

Track20 works within the FP2020 governance framework by supporting the Performance Monitoring and Accountability Working Group and coordinating with the Task Team, other working groups, the PMA2020 project, and other partners. Track20 will report on core FP2020 indicators for all FP2020 countries, but will focus efforts and activities in the countries which originally pledged a commitment at the July 2012 London Summit on Family Planning. The remaining FP2020 countries will have access to some technical support, though to a much lesser degree.

Track20 Countries

Track20 Focus Countries include Bangladesh, Burkina Faso, Côte d'Ivoire, Democratic Republic of Congo, Ethiopia, Ghana, India, Indonesia, Kenya, Malawi, Mozambique, Niger, Nigeria, Pakistan, Philippines, Rwanda, Senegal, Sierra Leone, Solomon Islands, Uganda, Zambia, Zimbabwe
Track20 Additional Countries include Afghanistan, Benin, Bhutan, Bolivia, Burundi, Cambodia, Cameroon, Central African Republic, Chad, Comoros, Congo, Democratic People's Republic of Korea, Djibouti, Egypt, Eritrea, Gambia, Guinea, Guinea-Bissau, Haiti, Honduras, Iraq, Kyrgyzstan, Lao PDR, Lesotho, Liberia, Madagascar, Mali, Mauritania, Mongolia, Myanmar, Nepal, Nicaragua, Papua New Guinea, São Tomé and Príncipe, Somalia, South Africa, South Sudan, Sri Lanka, State of Palestine, Sudan, Tajikistan, Timor-Leste, Togo, United Republic of Tanzania, Uzbekistan, Viet Nam, Western Sahara, Yemen

Track20 Key Activities

National-level M&E officer recruitment
- Offered to Track20 Focus Countries
- Placed in the MOH, Office of Population, or other relevant body
- To serve as point person for FP data, by facilitating and supporting compilation of data

Annual data consensus-building workshops
- To bring together partners (government, UN, USAID, NGO, etc.) to review, discuss, and analyze available data
- To use expanded UN model to estimate annual mCPR

Country expenditure tracking
- To ensure disaggregation of FP expenditures from RH
- To combine information from multiple sources (WHO/KFF/NIDI) to estimate expenditures

Expansion of UN Population Division model for estimating FP indicators
- To allow for country-level use of model
- To include additional data sources (service statistics, commodity data, private and NGO sector data)

Creation and implementation of FP M&E tools and materials
- Rapid assessment of service statistics
- Other tools, such as Apps and online interactive interfaces, that highlight country-produced data

Documentation and dissemination of country progress and lessons learned
- Website (www.track20.org)
- Contribution of data to annual FP2020 reports
